

Day 10 Classwork Worksheet

Skill Breakout — Multiplying Decimals & Dividing Decimals

Name: _____

Date: _____

Period: _____

Show ALL work by hand in the space under each problem — pencil and paper (graph paper is best). Estimate first, then place the decimal point using place value, not guessing. Circle your final answer.

Part 1 — Multiplying Decimals (Problems 1–10)

Multiply. Remember: count the total number of decimal places in both factors, then place the decimal point that many places from the right in your product.

1. $23.4 \times 5.2 =$	2. $46.8 \times 3.1 =$
3. $12.7 \times 8.4 =$	4. $35.6 \times 2.9 =$
5. $64.3 \times 1.8 =$	6. $28.5 \times 6.7 =$
7. $51.2 \times 4.3 =$	8. $19.6 \times 7.5 =$
9. $82.1 \times 2.4 =$	10. $37.9 \times 5.6 =$

Part 2 — Dividing Decimals (Problems 11–20)

Divide. If the divisor is a decimal, move the decimal point to make it a whole number first — and move the decimal point in the dividend the same number of places.

11. $23.5 \div 5 =$	12. $61.2 \div 3.6 =$
13. $84.6 \div 4.7 =$	14. $156.8 \div 3.2 =$
15. $92.4 \div 2.8 =$	16. $126.36 \div 5.2 =$
17. $37.44 \div 4.16 =$	18. $68.40 \div 1.14 =$
19. $151.8 \div 6.9 =$	20. $73.20 \div 2.4 =$

Challenge: Priya says 75% of a number is the same as multiplying by 0.75. Pick one problem above, rewrite it as a percent-of-a-number question, and explain why her rule still works.

Day 10 Worksheet — Answer Key

Teacher reference — not for student distribution

Part 1 — Multiplication

1. $23.4 \times 5.2 = 121.68$

3. $12.7 \times 8.4 = 106.68$

5. $64.3 \times 1.8 = 115.74$

7. $51.2 \times 4.3 = 220.16$

9. $82.1 \times 2.4 = 197.04$

2. $46.8 \times 3.1 = 145.08$

4. $35.6 \times 2.9 = 103.24$

6. $28.5 \times 6.7 = 190.95$

8. $19.6 \times 7.5 = 147.00$

10. $37.9 \times 5.6 = 212.24$

Part 2 — Division

11. $23.5 \div 5 = 4.7$

13. $84.6 \div 4.7 = 18$

15. $92.4 \div 2.8 = 33$

17. $37.44 \div 4.16 = 9$

19. $151.8 \div 6.9 = 22$

12. $61.2 \div 3.6 = 17$

14. $156.8 \div 3.2 = 49$

16. $126.36 \div 5.2 = 24.3$

18. $68.40 \div 1.14 = 60$

20. $73.20 \div 2.4 = 30.5$
