

Choose Your Model

E L A + M A T H · W O R D S T U D Y

Mr. H Math · Day 25

WRITE YOUR NAME — one letter per box, straight and neat

Date: _____

Score: ____ / 13

Four tools, one idea: equal groups, the **double number line**, the **ratio table**, and the **graph** all make equivalent ratios by **multiplying both quantities by the same number**. Today you choose the fastest tool on purpose — and prove your answer a second way.

DO NOW · SILENT START

3 min

Show **5 : 3** as a ratio table with 3 rows and as a double number line.

MODEL MENU

Ratio table — multiplier is easy to see.

Double number line — answer lands between friendly marks.

Graph — comparing two ratios or testing a point.

SECTION A · REFINE EXAMPLES — SOLVE AND NAME YOUR MODEL

Problem	Model	Work	Answer
A. A florist puts 4 roses with every 6 daisies. Roses for 45 daisies?			
B. A car uses 3 gallons every 90 miles. Gallons for 105 miles?			
C. Lemonade 1: 2 scoops : 5 cups water. Lemonade 2: 3 scoops : 8 cups. Which is stronger?			
D. A printer prints 12 pages in 3 min. Pages in 10 min?			

SECTION B · ERROR ANALYSIS: 4 BLUE BEADS FOR EVERY 7 RED. BLUE FOR 28 RED?

Adding Flipped the order Multiplied only one quantity

Student	Work	Name the error	Fix it
Kiara	$28 - 7 = 21, 4 + 21 = 25$		
Marcus	$7 \times 4 = 28$, so 7 blue		
Tae	$28 \div 7 = 4$, so 28 blue		

EXIT TICKET

A bakery sells **6 muffins for \$9**. Find the cost of **10 muffins**. Model I chose: _____ because _____

REFINE · SUMMARY — Pick the model that fits: a **table** when the multiplier is easy, a **double number line** when the answer falls between marks, a **graph** when you compare. Name the multiplier, keep the quantities in order, and check with a second model.

★ Find the multiplier, keep the order, check it a second way! ★
