

Hidden Multipliers

E L A + M A T H · W O R D S T U D Y

Mr. H Math · Day 26

WRITE YOUR NAME — one letter per box, straight and neat

Date: _____

Score: ____ / 12

In real word problems nobody hands you the multiplier. **Circle** the two quantities in the ratio, **box** the number you scale to, and divide: **boxed number ÷ its partner** = the multiplier. Then do the same thing to the other quantity. Second half of class: **30 minutes of i-Ready** on the same skill.

DO NOW · DOUBLE NUMBER LINE

3 min

Fill in the line for **4 : 5**. What goes with **14**?

TURN & TALK

2 min

14 is not on a tick mark. How can you still find its partner?

Frame: "14 is halfway between ____ and ____, so ..."

SECTION A · TWO-STEP WORD PROBLEMS — SHOW THE MULTIPLIER

1. A school orders **3 buses for every 120 students**. 280 students are going. How many buses?

2. Trail mix: **2 cups nuts : 3 cups pretzels**. Jada planned for 12 cups of pretzels, then switched to 15. How many **more** cups of nuts?

3. A runner runs **5 miles in 40 minutes**. Minutes for 8 miles?

SECTION B · PROVE IT IS (OR ISN'T) EQUIVALENT — TWO WAYS

Pair	Yes / No	Proof 1: model	Proof 2: numbers
6 : 10 and 9 : 15			
4 : 3 and 10 : 9			
2½ : 1 and 15 : 6			

i-READY ONLINE LESSON · 30 MIN

Assigned lesson focus: **equivalent ratios — ratio tables and double number lines (6.RP.A.3a)**

Lesson name on my screen: _____ Quiz score: _____% Passed? ☐ Yes ☐ Not yet

One ratio table or double number line I copied from the lesson:

REFINE · SUMMARY — Multiplier = **new amount ÷ original amount of the SAME quantity**. Use it on the other quantity. Two ratios are equivalent when both simplify to the same ratio, their points share one line through (0, 0), or their cross products are equal.

★ Find the multiplier, keep the order, check it a second way! ★
